Preface

The University of Kansas Library's holdings include about 1500 volumes of works by Linnaeus and items of Linnaeana. The volumes listed here are for the most part drawn from two important collections in the Library: the Ralph N. Ellis Collection of some 25,000 books in the fields of ornithology, mammalogy, natural history, voyages and travels, and bibliography, and the Thomas Jefferson Fitzpatrick Collection of about eight thousand items in botany and early American science. We have arbitrarily limited the present list to those books published before 1835—a century after the appearance of the first edition of the *Systema Naturae*—a time when the impact of Linnaeus on the scientific community was still immediate and strong, when his work had not as yet become accepted as our common heritage, and before he became a subject of historical study. We have further limited the list to those items contained in B. H. Soulsby's great Linnaean bibliography, *A Catalogue of the Works of Linnaeus*, 2nd edition, London, 1933.

SMITHSONIAN
INSTITUTION

JUL 27 1964

Introduction

In the winter of 1735, the noted Dutch scholar Johan Frederic Gronovius, and his friend Isaac Lawson, a Scottish physician then visiting Leyden, published the first edition of Carl Linnaeus' *Systema Naturae*. A handsome broadsheet volume of only eleven pages of text, this was the book which established the course to be followed in all modern description and classification of the three kingdoms of nature. The author, then twenty-eight years old, had traveled from Uppsala to Harderwijk University on the Zuyder Zee to secure the degree of doctor of medicine, and having accomplished this he went on to Leyden to continue his medical studies before returning once more to Sweden. Recognition by Gronovius and the publication of the *Systema Naturae* afforded the young Linnaeus an introduction to the scientific community of Holland, to the great Herman Boerhaave, to Johannes Burman of Amsterdam, and to others, and Linnaeus stayed on in Holland for three of the most productive years of his incredibly active life. During the year he spent working with Burman in his herbarium and the two years he spent at Hartecamp as prefect of the gardens of Georg Clifford, Linnaeus published—in addition to the *Systema Naturae*—*Bibliotheca Botanica*, *Fundamenta Botanica*, *Musa Cliffortiana*, *Critica Botanica*, *Flora Lapponica*, *Methodus Sexualis*, *Corollarium Generum Plantarum*, *Genera Plantarum*, *Hortus Cliffortianus*, *Viridarium Cliffortianum*, *Classes Plantarum*, and his doctoral thesis on the ague in Sweden. In 1738 when he left Holland he was a respected scientist whose accomplishments were known throughout Europe.

Linnaeus' spectacular productivity during this time is due in part to the number of his manuscripts already in various stages of completion when he arrived in Holland. Certainly his doctoral thesis was ready for publication before he reached Harderwijk, and also the *Systema Naturae* (he had shown it to the astonished Gronovius in Leyden only shortly after he took his degree). The magnificent gardens and museums of the Continent and association with the most brilliant scientists of his day hastened him on to complete work already begun in Sweden, such as the *Bibliotheca Botanica* and the *Fundamenta Botanica*, both of which he published during his year with Burman, and inspired

him to new undertakings—the most notable from the bibliographical standpoint, the sumptuous *Hortus Cliffortianus*, and from the scientific standpoint, the *Classes Plantarum*.

Even before he left Sweden, however, Linnaeus' name had begun to be known. In his student years, at Lund in 1728 and at Uppsala in the next seven years, he won the admiration of Olaus Rudbeck and of the illustrious Dean Olof Celsius, both of them his benefactors, and of many others. His outstanding knowledge of botany and the promise he showed resulted in his installation as lecturer at the Uppsala University botanical garden when he was still only twenty-three. In 1732 the Royal Swedish Society of Science (Kgl. Vetenskaps-societeten) granted him money for his famous scientific journey through Lappland. In the summer and fall of 1733 Linnaeus presented lectures in geology at Uppsala, and in 1734 Baron Nils Esbjörnson Reuterholm invited him to travel in the province of Dalarna and to describe it as he had described Lappland. However, Linnaeus needed a doctoral degree in order to proceed in his career and to secure a university post, and thus he left for Harderwijk in the summer of 1735.

Upon his return from Holland with his degree and his new reputation, Linnaeus spent three years in Stockholm as a highly successful practising physician, at the same time lecturing in geology and botany at the Mining College and later at the Riddarhus. In 1739 he was one of the founders of the Royal Swedish Academy of Science (Kgl. Vetenskapsakademien), and he was appointed physician to the Admiralty.

Linnaeus longed to return to teaching and research, however, and having earned both recognition and a degree of financial security, he applied in 1740 for the Chair of Medicine and Botany at the University of Uppsala which had been left vacant by the death of Olaus Rudbeck. His bid was unsuccessful. However, in 1741 he received the King's warrant of appointment to a similar post, the Chair of Botany and Anatomy vacated by Roberg. Except for three journeys undertaken on public commission—to Öland and Gotland in 1741, to Västergötland and Bohuslän in 1746, and to Skåne in 1749—Linnaeus remained at Uppsala until his death.

During this period, Linnaeus created at Uppsala an important center for the study of natural history. He improved his own texts—texts

which had become necessary adjuncts to his lectures. He established a greenhouse and a museum of natural history, and he saw to the repair and development of the University botanical garden at Uppsala. His lectures were very popular and he attracted fellow scholars and students from all over Europe. At the same time, his own researches and publication continued at an almost unbelievable rate.

Between the years 1739 and 1778 he wrote a number of essays and short scientific papers, including fifty contributions to the Transactions of the Royal Swedish Academy of Science. The 185 published academic theses which bear his name as praeses are almost entirely his own work: according to the custom of the time at Uppsala, the defendant was responsible only for translating his professor's lecture into passable Latin and for having the essay printed.

Linnaeus furthermore continued to produce new major works and to revise and expand earlier ones. The *Flora Suecica* (1745) and the *Fauna Suecica* (1746) were models for succeeding regional catalogues. The *Materia Medica* (1749) was a vitally important work on pharmacology. In 1748 he published *Hortus Upsaliensis*, a catalogue of the Botanical Garden at Uppsala. In 1751 he summarized his early studies in the theory of botany in *Philosophia Botanica*, clearly explaining the terms to be used in describing all the parts and properties of a plant. But perhaps his most important work from this period is the *Species Plantarum* (1753) in which he describes and classifies some eight thousand species of plants, employing specific names for genus and species in place of long descriptive phrases. The publication of the tenth edition of the *Systema Naturae* (1758) marked the beginning of modern zoological nomenclature: here Linnaeus extended the use of the binomial system to the three kingdoms of nature. In all, Linnaeus supervised the publication of twelve editions of the *Systema Naturae*, and with the appearance of the twelfth edition in 1766 the work had grown to three volumes containing 2300 pages. He also occupied himself with revision and expansion of the *Genera Plantarum*: the first edition (1737) contained 935 genera, but in the sixth (1764), the last that Linnaeus personally edited, the number of genera reached 1239.

On the death of Linnaeus (he took the form Carl von Linné in 1762 when he was ennobled) the thousands of specimens in his collections, his scientific library of over two thousand volumes, his vast cor-

respondence with the leading scientists of his day, and a number of manuscripts, some of them unpublished, were handed down to his family. After the death of his son, Carl von Linné the younger, the entire precious archive was purchased by an Englishman, James Edward Smith, who, with Sir Joseph Banks, then President of the Royal Society, and Samuel Goodenough, became a co-founder, and himself the first president of the Linnaean Society of London, the present home of the collections.

1735

Systema naturae, sive, regna tria naturae systematice proposita per classes, ordines, genera, & species . . .

Lugduni Batavorum: apud Theodorum Haak, ex typographia Joannis Wilhelmi de Groot, 1735.

[7] sheets. plate. 58cm.

Soulsby 39

A single plate, "Caroli Linnaei classes s. literae," is tipped in on a half-sheet between sheets 3 and 4. With this is bound, following the title sheet, *his*:

... Methodus juxta quam physiologus accurate & feliciter concinnare potest historiam cujuscunque naturalis subjecti, sequentibus hisce paragraphis comprehensa.

Lugduni Batavorum: apud Angelum Sylvium, 1736.

[1] sheet. 58cm.

Soulsby 40

1736

Caroli Linnaei . . . bibliotheca botanica recensens libros plus mille de plantis huc usque editos, secundum systema auctorum naturale in classes, ordines, genera & species dispositos, additis editionis loco, tempore, forma, lingua, &c. Cum explicatione. Fundamentorum botanicorum pars Ima.

Amstelodami: apud Salomonem Schouten, 1736.

[8]p. l., 153[13]p. 16cm.

Soulsby 250

With this is bound, as issued, *his*:

Fundamenta botanica, quae majorum operum prodromi instar theoriam scientiae botanices per breves aphorismos tradunt.

Amstelodami: apud Salomonem Schouten, 1736.

[4]p. l., 35[1]p. 16cm.

Soulsby 250

Caroli Linnaei . . . musa Cliffortiana florens Hartecampi 1736 prope Harlemum.

Lugduni Batavorum: 1736.

4p. l., 46[2]p. 2 plates (fold.). 25cm.

Soulsby 275

1737

Caroli Linnaei . . . critica botanica in qua nomina plantarum generica, specifica & variantia examini subjiciuntur, selectiora confirmantur, indigna rejiciuntur; simulque doctrina circa denominationem plantarum traditur. Seu Fundamentorum botanicorum pars IV. Accedit Johannis Browalli de necessitate historiae naturalis discursus.

Lugduni Batavorum: apud Conradum Wishoff, 1737.

8p. l., 270[44]p; 4 l., 24p. 22cm.

Soulsby 276

Discursus has special title page.

Caroli Linnaei . . . flora Lapponica exhibens plantas per Lapponiam crescentes, secundum systema sexuale collectas in itinere impensis Soc. Reg. Litter. et Scient. Sueciae a. MDCCXXXII. instituto. Additis synonymis, & locis natalibus omnium, descriptionibus & figuris rariorum, viribus medicatis & ceconomicis plurimarum.

Amstelaedami: apud Salomonem Schouten, 1737.

20p. l., 372[38]p. front., plates. 20cm.

Soulsby 279

Hortus Cliffortianus plantas exhibens quas in hortis tam vivis quam siccis Hartecampi in Hollandia, coluit . . . Georgius Clifford . . . reductis varietatibus ad species, speciebus ad genera, generibus ad classes, adjectis locis plantarum natalibus differentiisque specierum. Cum tabulis aeneis. Auctore Carolo Linnaeo . . .

Amstelaedami: 1737.

[16]l., x, 210p.; 301-501[17]p. front., 35 plates. 45cm.

Soulsby 328

"The text was partly printed in quarto, but, owing to the size of the plates, had to be reprinted in folio, which accounts for the pagination." (Soulsby)

Caroli Linnaei . . . genera plantarum eorumque characteres naturales secundum numerum, figuram, situm, & proportionem omnium fructificationis partium.

Lugduni Batavorum: apud Conradum Wishoff, 1737.

8p. l., 384[20]p. table (fold.). 21cm.

Soulsby 284

1738

Petri Artedi . . . ichthyologia sive opera omnia de piscibus scilicet: bibliotheca ichthyologica, philosophia ichthyologica, genera piscium, synonymia specierum. Omnia in hoc genere perfectiora, quam antea ulla. Posthuma vindicavit, recognovit, coaptavit & edidit Carolus Linnaeus . . .

Lugduni Batavorum: apud Conradum Wishoff, 1738.

5v. in 1. 20cm.

Soulsby 3563

7v.

Soulsby 1280

Included below are descriptions of the individual volumes of this edition only, designated "The Linnaeus Edition."

Caroli Linnaei . . . amoenitates academicae seu dissertationes variae physicae, medicae, botanicae antehac seorsim editae nunc collectae et auctae cum tabulis aeneis. [Volumen primum]

Holmiae et Lipsiae: apud Godofredum Kiesewetter, 1749.

2p. l., 563p. plates (fold.). 21cm.

Soulsby 1282

The "Linnaeus edition."

. . . Gemmae arborum, quas . . . sub praesidio . . . Caroli Linnaei . . . speciminis academici loco naturae curiosis examinandas sistit . . . Petrus Löffling . . . ad diem 18 Novemb. anni 1749 . . .

Upsaliae: [1749]

[2]p. l., 32p. 19cm.

Soulsby 1556

Disputatio medica inauguralis de generatione calculi, quam . . . praeside . . . Carolo Linnaeo . . . ad diem V. Aprilis anni MDCCXLIX . . . eruditus examinandam offert . . . Joh. Otto Hagström . . .

Upsaliae: [1749]

[2]p. l., 27[1]p. 19cm.

Soulsby 1538

Page 27 misnumbered 17.

. . . Dissertatio medica de haemorrhagiis uteri sub statu graviditatis, quam . . . sub praesidio . . . Caroli Linnaei . . . publicae placidaeque bonorum mod. subj. disquisit. Ericus Er. Elff . . . ad diem VI. Decemb. anni MDCCXLIX . . .

Upsaliae: [1749]

23[1]p. 19cm.

Soulsby 1563

. . . Lignum colubrinum leviter delineatum . . . praeside . . . Carolo Linnaeo . . . publico examini submittit . . . Johan. Andr. Darelius . . . ad diem XI. Mart. anni MDCCXLIX . . .

Upsaliae: [1749]

22p. 19cm.

Soulsby 1531

Caroli Linnaei . . . materia medica. Liber I. de plantis. Secundum: genera, loca, nomina, qualitates, vires, differentias, durationes, simplicia, modos, usus, synonyma, culturas, praeparata, potentias, composita, digestus . . .

Holmiae: typis ac sumptibus Laurentii Salvii, 1749.

[16]p. l., 252p. front., plate (fold.). 20cm.

Soulsby 968

Caroli Linnaei . . . materia medica. Liber I. de plantis. Digestus secundum genera, loca, nomina, qualitates, vires, differentias, durationes, simplicia, modos, usus, synonyma, culturas, praeparata, potentias, composita.

Amstelaedami: apud J. Wetstenium, 1749.

16p. l., 252p. front., plate (fold.). 21cm.

Soulsby 970

Pirated edition.

. . . Specimen academicum de oeconomia naturae, quod . . . praeside . . . Carolo Linnaeo . . . publico examini modeste submittit Isacus J. Biberg . . . ad diem IV. Mart. anni MDCCXLIX . . .

Upsaliae: [1749]

[4]p. l., 48p. 19cm.

Soulsby 1514

Pan suecicus, quem . . . praeside . . . Carolo Linnaeo . . . publico examini modeste submittit Nicolaus L. Hesselgren . . . ad diem IX. Decemb. anni MDCCXLIX . . .

Upsaliae: [1749]

[2]p. l., 38 p. 19cm.

Soulsby 1565

. . . Radix senega, quam . . . praeside . . . Carolo Linnaeo . . . publicae censurae submittit Jonas Kiernander, And. fil. . . ad diem [VIII] April. anni MDCCXLIX . . .

Holmiae: typis Laurentii Salvii [1749]

32p. plate. 20cm.

Soulsby 1545

1750

Index supellectilis Lapideae, quam collegit, in classes & ordines digessit, specificis nominibus ac synonymis illustravit Johannes Fredericus Gronovius. Editio altera.

Lugduni Batavorum: apud Cornelium Haak, 1750.

[7]p. l., 106 [6]p. 22cm.

Soulsby 3610

. . . Dissertatio materia medica in regno animali, quam . . . praeside . . . Carolo Linnaeo . . . publico examini modeste subjicit . . . Jonas Sidrén . . . d. XXV Junii, anni MDCCCL . . .

Upsaliae: [1750]

20p. 19cm.

Soulsby 1605

. . . Plantae rariores camtschatcenses. quas . . . praeside . . . Carolo Linnaeo . . . speciminis academici loco publico examini modeste submittit Jonas P. Halenius . . . ad d. XXII. Dec. anni MDCCCL . . .

Upsaliae: [1750]

[2]p. l., 30p. plate (fold.). 19cm.

Soulsby 1612

... Semina muscorum detecta ... praeside ... Carolo Linnaeo ... publicae disputat. ... d. XXV Apr. ... Petrus Jonas Bergius ...

Soulsby 3751

1834

Lives of eminent zoologists, from Aristotle to Linnaeus: with introductory
remarks on the study of natural history, and occasional observations on the
progress of zoology. By W. Macgillivray...with a portrait of Linnaeus en-
graved by Horsburgh. Second edition.

Edinburgh: Oliver & Boyd; London: Simpkin & Marshall, 1834.

391p. front. port. 17cm.

Soulsby 2684c

Index

An index to the titles of works by Linnaeus, and to the names of editors, translators, respondents to theses, and authors of related works.
